

Portfolio, Project and Resource Management Services

Information is often dispersed across multiple systems in inconsistent formats and with suboptimal information-based processes. This, combined with limited cultural championing, hampers an organisation's ability to align its pipeline with corporate objectives and ensure that the right projects are selected, prioritised correctly and appropriately resourced.

Creation of an integrated Portfolio, Project and Resource Management (PPRM) capability that combines portfolio management decisions, resource management demands and project management skills, supports the successful delivery of an organisation's strategic objectives.

An integrated PPRM capability maximises the alignment of the portfolio with corporate strategic objectives

Kinapse's PPRM Framework

Clearly defined roles and responsibilities and interfaces

Improving the clarity of portfolio forecast responsibility, and accuracy of planned/ actual reporting

Integrated and consistent processes

Increasing R&D efficiency by freeing resources for higher-value portfolio modelling and decision analysis

Effective communication and a culture of transparency

Fostering collaboration across the organisation based on partnership and mutual respect

User-friendly information management

Supporting effective PPRM data collection, reporting, and decision analysis activities

Aligned management of performance

Aligning PPRM objectives, resource allocation and operational KPIs with corporate strategy

Benefits to our clients include:

- ▶ Maximised portfolio value through better alignment between corporate objectives and capabilities
- ▶ Optimised use of resources across the portfolio
- ▶ Effective assessment of project delivery against portfolio strategy
- ▶ Increased efficiency of executive decision-support at portfolio, TA, functional and individual project level
- ▶ Cost-Effective delivery of reports, analytics and data quality control
- ▶ Clients' internal resources available to focus on high value-added activities

Portfolio, Project and Resource Management Services

We deliver thorough PPRM capability assessments and we support organisations to build best-in-class capability. We deliver strategic value by tackling specific PPRM areas such as portfolio review, resource modelling and project planning.

We also execute data extraction, analysis and reporting of information from multiple data sources using tried and tested processes through our India-based Offshore Delivery Centre.

Our delivery model is founded on tightly-defined processes set up to ensure we provide unmatched value to our clients in quality, reliability and cost.

Kinapse provides life sciences Consulting and Outsourcing
